**ABSTRACT:**

CHG DATE=19990617 STATUS=O> Method of coating a bottle 1, for example a glass bottle, with a plastic film using a machine for injecting the plastic, consisting in positioning the bottle 1 around a punch 2 of an injection station of the machine and in surrounding the bottle with an injection mould 4, then in injecting the plastic around the bottle and blowing a pressurised fluid inside the bottle

synchronously with the injection of plastic.
